

# TYPHOON MULTIMEDIA KEYBOARD

## Introduction

**Article Number: 40352**

Typhoon Multimedia Keyboard features both Multimedia and Internet hot keys. Ergonomically designed with a wrist pad to avoid aching wrist during extended use. It also has hot keys supporting the system power management. Designed basically to support and enhance using Windows® Multimedia control functions and Internet browsing.

Standard 105 keys layout with Functions keys for additional tasks. Sleep key for placing the system on standby in a single touch. Launch your default email application directly from the hot key, or call out the calculator easily. Bypass all the menu and sub-menu to reach all these frequently use tasks. Run your video or music CD, and control the volume and playback directly from the Typhoon Multimedia Keyboard. No need to access any applications to adjust.
